

# Documentation of AI Tool Used

## Tool Used:

OpenAI ChatGPT (GPT-4) via ChatGPT web interface

## Use Cases:

- Generating Python code for:
  - Some EDA visualizations (Seaborn/Matplotlib)
  - Regression model setup (Scikit-learn)
  - Explain some of the concept used in Data Science
  - Debugging Flask API deployment errors
- Fixed errors of HTML codes for basic calculators

## Prompt Examples:

Prompt 1:

"Explain what R-squared and p-values mean in simple terms."

Prompt 2:

"Fix this error in my Flask deployment: ModuleNotFoundError: No module named 'flask\_cors'"
